

Tadpoles

Dear School Parents,

Keeping our families involved is our first priority. The Tadpoles program allows our teachers to capture special moments, take photos, and videos of the children in action as well as send you information. You'll get daily reports and notes right in your email!

Each classroom is equipped with an iPad mini which will be specifically used for the Tadpoles program. If you see a teacher on what looks like a phone, rest assured, they are not, as per school policy--no cell phones in the classroom!

We consider all information captured using Tadpoles to be a private communication between our school and our families. No personal information is shared with any external parties and as a parent you will only receive information specifically about your child.

We will be using the email address we have on file to communicate via the Tadpoles program. Please let us know if that should be updated. Feel free to download the parent app by searching for Tadpoles Parent on your iPhone, iPad, or Android device.

We're happy to answer any questions or concerns you may have about this exciting program!

Thank you!
